

# PERFECT BOUND BOOKS

## SUPPLYING ARTWORK GUIDE

### Pages

Pages for PUR Bound books must always be divisible by 2, supplied to us as a multipage PDF. For example if you are supplying artwork for an 12-page booklet please supply two PDF's including the following:

- 1 COVER** containing outer and inner covers, both with spine, exported as a double page spread.
- 2 TEXT** containing 8 pages running in chronological order from front to back.

### Supplying your artwork example

### Inner booklet pages

The closer you get to the centre pages of a booklet, the more has to be trimmed off the page edges. Our imposition software does make allowances for this. However, it is recommended that you do not have text (especially page numbers) or images too close to the edges of your booklet pages. A gap of at least 5mm is recommended on all edges.
